# Vision Statement

We work together to build communities which live in peace and resist the politics of fear and hate. We bequeath to our children and grandchildren a world that values cooperation, rejects war as a political tool, and has eliminated nuclear weapons.

# What we do

- peace awards for high school seniors
- peaceful activism through journalism and protests
- holding a vigil in memory of Hiroshima and Nagasaki victims
- participating with other area peace groups in Memorial Day and Labor Day Parades in Rochester
- work with the Geneseo Students
- War Toys demonstrations

# Goals

Peaceful resolution of international disputes, with reduced reliance on standing armies and forced military service.

Immediate reduction of nuclear weapons and eventual elimination of all such weapons; an end to the international arms race that devours billions of dollars and diverts vital resources from economic and social development.

An end to overt and covert U.S. intervention in Latin America and elsewhere, with an emphasis on regional solutions to regional problems.

Discouragement of our society's tendency to glorify war and brutality.
